Election/Restriction

A restriction was made on 05/28/2002. Applicant's election of group I in Paper No. 5 is acknowledged. A further restriction to one of the following inventions is required under PCT Rule 13.1:

- I. Claims 1-12, 28 and 29, drawn to a human inflammatory breast cancer xenograft growing within lymphatic and blood vessel channels and a in vitro culture of a human inflammatory breast cancer xenograft, a method of making, and a method of using the xenograft to identify a molecule whose expression is modulated in inflammatory breast cancer.
- II. Claims 13-18, drawn to a method for evaluating at least one agent for treating inflammatory breast cancer.
- III. Claims 19-22, drawn to a method for evaluating at least one agent for identifying inflammatory breast cancer.
- IV. Claims 23-27, drawn to a method for evaluating the potential of an agent, or a combination of agents, for the prevention of lymphovascular invasion of carcinoma cells.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I encompasses a human inflammatory breast cancer xenograft growing within lymphatic and blood vessel channels, a method of making and the first method of using the xenograft. Groups II-IV are directed to mutually exclusive methods that require different special technical features as summarized as follows: Group II is directed to a method of evaluating an agent for treating inflammatory breast cancer, Group III is directed to a method of evaluating an agent for identifying inflammatory breast cancer, and Group IV is directed to a method of evaluating the potential of an agent, or a combination of agents for the prevention of lymphovascular invasion of carcinoma cells. Each method requires specific technique feature other than the technique used in Group I. Thus, Groups

Art Unit: 1632

I-V lack a common special technical feature. Further, 37 CFR 1.475 does not provide for multiple independent products, methods of manufacture and methods of use (37 CFR 1.475(d)).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).)

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Liping Chen, whose telephone number is (703) 305-4842. The examiner can normally be reached on Monday through Friday from 8:00 to 5:00 (Eastern Standard Time). Should the examiner be unavailable, inquiries should be directed to Deborah Reynolds, Supervisory Primary Examiner of Art Unit 1632, at (703) 305-4051. Any administrative or procedural questions should be directed to Pauline Farrier, Patent Analyst, at (703) 305-3550. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center number is (703) 308-8724.

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 1632.
